ON THIS 18 DAY OF AUGUST 2010

The first part of the paper is devoted to a study of the
 properties of the \mathcal{L}_∞ -norm. It is shown that the
 norm is a continuous function of the elements of the
 space. This result is used to prove that the set of
 all continuous functions on a compact set is a
 complete metric space.

In the second part of the paper, we consider the
 problem of approximating a continuous function by
 a finite sum of functions. It is shown that for any
 continuous function on a compact set, there exists a
 finite sum of functions which approximates the
 function to any desired accuracy.

The final part of the paper is devoted to a study of
 the properties of the \mathcal{L}_1 -norm. It is shown that
 the norm is a continuous function of the elements of
 the space.
