

QUARTERLY UPDATES

Welcome Pamela McCutcheon to the Belmont County Engineer's Office

The Belmont County Engineer's Office is pleased to welcome Pamela McCutcheon, who joined our team as Administrative Assistant on May 18, 2026.

Pamela is a lifelong resident of Belmont County and brings valuable experience to her new role. Prior to joining the Engineer's Office, she worked in the scale house at Kimble, where she enjoyed being around the trucking industry. Before her time at Kimble, Pamela worked at her family's business, Matussek Trucking, LLC. She shared that working at the scale house reminded her of being part of the family trucking business and provided a familiar and rewarding environment.

Pamela McCutcheon Administrative Assistant

When she is not at work, Pamela enjoys spending quality time with her family. She is the proud mother of three children: Cortney (35), Casey McCutcheon (31), and Jeffry McCutcheon (21). She is also a devoted grandmother to Bently (9) and Catriona (3). Her favorite pastime is making memories with her children and grandchildren.

Pamela's favorite vacation destination is the beach, where she enjoys the sunshine, water, and sand. And when it comes to food, nothing beats a good steak.

Please join us in welcoming Pamela to the Belmont County Engineer's Office. We are excited to have her as part of our team and look forward to the contributions she will make in her new role.

BELMONT COUNTY ENGINEER'S OFFICE WELCOMES NEW ROAD MAINTENANCE SUPERVISOR AND HONORS TWO LONG-TIME LEADERS

The Belmont County Engineer's Office recently experienced an important leadership transition within the Road Maintenance Department as we welcomed a new supervisor while recognizing the dedicated service of two long-time employees.

On June 29, 2026, **Justin Mowery** was promoted to Road Maintenance Supervisor, becoming the first of two supervisors selected to fill the vacancies created by the departures of Keith Luyster and Dwayne Leach.

Justin's promotion reflects the Engineer's Office's commitment to developing talent from within the organization. He joined the department on November 14, 2022, as a Bridge Worker II assigned to the Lloydsville Garage. Prior to joining the Engineer's Office, Justin served as a Distribution Manager with the local Water Department and also gained valuable public service experience while working for Colerain Township in Belmont County.

Known for his positive attitude and ability to connect with people, Justin describes himself as someone who can strike up a conversation with anyone. Combined with his diverse work experience and strong leadership potential, these qualities made him an excellent choice for his new supervisory role. Outside of work, Justin enjoys spending time camping with his family.

Please join us in congratulating Justin Mowery on his well-earned promotion and wishing him continued success as a Road Maintenance Supervisor.

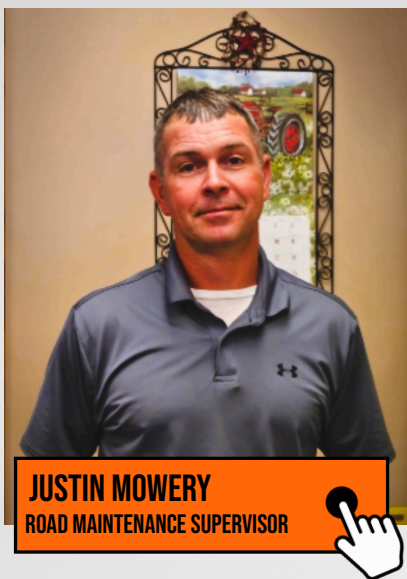

Honoring Years of Dedicated Service

Leadership transitions also provide an opportunity to recognize the remarkable contributions of those moving on to new chapters in their careers.

Keith Luyster concluded his employment with the Belmont County Engineer's Office on June 5, 2026, after 19 years of dedicated service. Throughout his career, Keith earned the respect of his coworkers through his leadership, knowledge, and commitment to maintaining Belmont County's transportation infrastructure. His experience and management skills will certainly be missed. Keith has accepted a position with a family-owned and operated business, and we extend our sincere appreciation for his years of service while wishing him every success in his new endeavor.

Following Keith's departure, **Dwayne Leach** announced his retirement, with his final day of employment being June 30, 2026. Dwayne dedicated 20 years of service to Belmont County and brought an additional 16 years of industry experience to the Engineer's Office. In addition to serving as a Road Maintenance Supervisor, Dwayne also managed the department's fleet operations, providing exceptional oversight of the county's equipment and vehicles. Although retiring from county service, Dwayne isn't slowing down. He has accepted a new opportunity managing a heavy equipment leasing business, where his extensive knowledge and expertise will undoubtedly continue to serve him well.

We thank both Keith and Dwayne for their years of dedicated public service and the lasting impact they have made on the Belmont County Engineer's Office. Their leadership has helped shape the department, and we wish them both the very best as they begin the next chapters of their careers.

From Terry's Desk Belmont County Update

Our road crews began April by cleaning up trees and dragging the gravel roads. The bridge crew made minor repairs to a bridge just off CR 78 Badgersburg Road and removed debris from several low water pipe crossings. The road crews ditched several roads, including CR 80 Pogue Road, CR 12 Farmington Road, and CR 54 Dilles Bottom Road. On the 7th, our GIS department participated in Surveyor's Day at Harrison Central High School. The event was hosted by the Ohio Society of Professional Surveyors and introduced students to careers in the surveying field. We opened bids on our annual chip seal project on the 8th, and once again SC Construction won with a bid of \$698,110.29. The annual guardrail spraying work began on the 14th, while the bridge crew repaired guardrail on South 26 and CR 54 Pipe Creek Roads. The road crew repaired more soft areas on CR 80 Pogue Road and built a stone pad for our future salt barn at the Roscoe Garage. Following frequent spring storms, the crews were busy removing debris from box culverts on Smith T-247 Groves Road and clearing culverts on CR 100 Egypt Valley Road. Mid-month we were able to resume hot mix asphalt patching, and we performed our annual truck inspection on the 22nd. The bridge crew completed the CR 80 Lloydsville Bannock culvert replacement on the 23rd, and we held our annual Safety Day on the 24th. The road crews finished the month by repairing a washout on CR 102 Johnson Ridge, while the bridge crew repaired guardrail on CR 82 Airport Road and cleaned a bridge deck on CR 10 Blaine Barton Road.

Our bridge crew started May by doing some maintenance on our only covered bridge and the historic National Road "S" bridge. The road crews were busy dragging gravel roads and repairing a soft area on CR 92 New Castle Road, while the bridge crew repaired guardrails on CR 4 Barton Road and CR 10 Barton Blaine Road. On the 6th, we opened bids on the CR 82 Airport Road Shale and Oil paving project. The winning bid was submitted by Shelly & Sands for \$545,435, of which \$500,000 is paid by the grant, and the remainder by the Engineer's Motor Vehicle Gas Tax (MVGT) funds. The road crews replaced culverts on CR 4 Willow Grove Road and CR 92 New Castle Road, while the bridge crew replaced guardrail and cleaned bridges on CR 2 Deep Run Road. The road crews completed a rock fill repair on CR 4 Crescent 250 Road, and the office staff assisted Mead Township with an engineer's estimate for T-296 Cash Ridge paving. On the 27th we opened bids for a slip repair on CR 4 Hawthorn Hill Road. Ohio West Virginia Excavating submitted the winning bid of \$188,110. The project is 74% funded by an Ohio Public Works Commission (OPWC) grant and loan, and 26% by the MVGT funds. The bridge crew ended the month by cleaning debris from the CR 54 Dillies Bottom bridge.

The road crews kicked off June by patching roads for the upcoming chip seal project. They were also busy cleaning up trees and clearing culverts. Inbetween storms, they were able to replace a large culvert on CR 10 Black Oak Road ahead of the paving project and repair a soft area on CR 128 Boston Road. The office staff reviewed and approved plans for a new bridge on Wheeling T-425 Henderson Ridge Road. The new bridge will be built to modern standards and will be wide enough to accommodate two-lane truck traffic. Ascent Resources is entirely funding the replacement. Also, the office staff assisted the Belmont County Transportation Improvement District (TID) with executing the contract with ADR to begin design on the new US 40/CR 10 intersection. On the 26th, ODOT opened the newly rebuilt US 40 Blaine Hill bridge (Arches of Memory bridge) after two years of closure. Finally, our road crews replaced a culvert on CR 82 Airport Road in preparation for the paving project coming later this summer. Please stay alert in the construction zones and enjoy your summer!
