

After a two year hiatus, the safety meeting has returned to the Belmont County Engineer Office. The break from the meeting was due to COVID, but 2019 also came to an abrupt end because of a disaster level slide on CR 16 Nixon Run. Our crews worked for hours, and into the next day to clean up the slide. Now we are getting back on track. The 2022 day of Safety Training included representatives from the Health Department, Ohio State Patrol, CORSA, and our own Human Resource Department.
