

# Safety Day

On May 2, 2025, all employees of the Engineer's Office gathered at the Roscoe Garage for the annual safety training event. The day's agenda included a variety of informative presentations and activities focused on safety awareness and best practices. The training began with a presentation from CORSA, the County's insurance carrier. The Engineer's Office was recognized for its outstanding performance in 2024, receiving high marks for effectively managing and minimizing claims.

Representatives from Samsara, a new GPS vendor, introduced the safety features integrated into the GPS units being implemented in our fleet vehicles. This was followed by a flagger instructional training video, which provided updated guidance on safe flagging procedures. Nancy Z's Catering once again provided lunch for the event, marking the second consecutive year of their service. Following lunch, staff gathered for group photographs.

In the afternoon, the Ohio State Highway Patrol delivered a presentation on Commercial Driver's License (CDL) laws and requirements. The final presentation of the day was given by Jacob Manning, Legal Counsel to the Belmont County Commissioners and all County Elected Officials. Mr. Manning discussed proper employee responses to workplace incidents and accidents. To conclude the event, County Engineer Terry Lively provided closing remarks and directed staff to collect their safety awards.
